

WENT TO RESCUE

Verdi Wireless Operator Tells Story of Ancona.

Two Ships Sent S. O. S. Call to Italian Steamer.

HUNTED FOR ANCONA BOATS

Cleared Decks in Expectation of Submarine Attack.

Sent Aid to Stricken "France" From Shore Stations.

New York, Nov. 20.—Fresh and dramatic details of what happened in the Mediterranean on the morning of November 7, when the Ancona was torpedoed by a submarine flying the Austrian flag, were brought to New York today by the Italian steamer Giuseppe Verdi, head of her maiden voyage. The Verdi, heard on the Ancona's wireless death cry, flashed it on to shore stations which the feeble batteries of the sinking steamer could not reach and then rushed at full speed to the Ancona's aid, her boats swung outward, her passengers lined on the deck and her officers momentarily expecting a death blow from the lurking submarine. The Verdi steamed as near as she dared to the spot where the Ancona went down, but without success. Then, turning swiftly, she fled for Gibraltar and security.

Luigi Moroni, wireless operator of the Verdi, told the story here today. "We were about 200 miles off from Palermo, watching for submarines which we had been told were nearby on the morning of the 7th," he said. "At twenty minutes past nine I got a signal, 'S. O. S. France Submarine' the message said. Then 'Help.' This was followed by the France's position and then there was nothing more. I notified Captain Zannoni and the France's message at once to shore wireless stations at Bizerta and Cape Speroni. The ships that relayed the message brought back the torpedo boats were on the way to help the France and get the submarine.

Pick Up Ancona Call. "We exchanged several other messages with the relay ships concerning the France and submarines and while we were talking the Ancona's wireless spoke. I looked at the clock. It was half past nine. I said, 'S. O. S. Ancona.' We got the Ancona's position. I sent this message to the shore stations. The shore stations sent back an answer. Go to the Ancona," it said.

"Captain Zannoni swung his ship rightabout and gave orders for full speed. Then he called the passengers on the deck. The small boats were quickly loaded with emergency supplies and swung out on their own speed. The passengers were assigned to the boats, every man, woman and child being given a number. They were then asked to be prepared to know the life boats as we did not know when a submarine would fire a torpedo into the Verdi.

No Trace of Ship. "It was 94 miles to the Ancona and we made it at that speed. I tried several times to get the Ancona by wireless but she didn't answer. Afterward we learned her wireless had been shot away by the submarine.

"The captain went as close to the Ancona's position as he dared to take the Verdi and doubled the lookout. We slowed down and tried to find some trace of the Ancona or her boats with glasses, but failed to do so. Then we turned about and steamed away; we didn't want to stay there too long and invite attack on ourselves.

Moroni's story was verified by several of the steamer's 535 passengers, among them being Charles B. Perry, American consul at Torino, Italy.

TO MAKE CLEAN SWEEP

H. A. Hodgins Expects Every County Officer to Be Republican.

That the result of the next election will be a Republican in every office at the Shawnee county court house, is the contention of H. A. Hodgins, candidate for sheriff.

Mr. Hodgins has been connected with Shawnee county politics for years and has been connected with the Topeka Ice, Fuel & Storage company since 1903. Prior to 1903 he was engaged in the live stock business in Topeka and Shawnee county.

"I do not believe that the exceptionally large bunch of candidates for the office of sheriff, which he stated, will keep me from landing the majority vote. I am going after the job to win and expect to be the next sheriff. I look for the Republican party to make a clean sweep in the next election."

LILLEY TO REPUBLIC

Los Angeles Newspaper Man Manages St. Louis Publication.

St. Louis, Mo., Nov. 20.—B. R. Lilley, formerly general manager of the Express and the Tribune of Los Angeles, Cal., has been appointed general manager of the St. Louis Republic. An announcement by the Republic Friday night said Mr. Lilley would shortly take up the duties of the position. Mr. Lilley will be an addition to the present working staff of the Republic, which has been otherwise unchanged, it was announced.

BIG MOOSE SMOKER

A Large Crowd Attended Stag Entertainment of Local Lodge.

The stag smoker given by the Loyal Order of Moose Friday night was a pronounced success. At 8:15 the program was started before a capacity audience of Moose and prospective members.

A good musical program was rendered. Interesting addresses were made by M. W. Cardwell, Albert B. Wimsatt and Gerald F. Gahan.

E. L. Moon, acting as chairman, then announced the main event, a six round boxing contest between Joe Folmer and George O. Fitzgibbon, which was refereed by George O. Fitzgibbon.

The boys gave a fine demonstration of the main art of self-defense and those who were fortunate enough to be present were highly elated over the event. The ladies spent an enjoyable evening in the club room while the men were attending the stag at Booster headquarters.

WEEK'S MARKETS

Irregular Prices and Small Dealings Trade Features.

War Shares Slightly Off; Railroad Shares Look Up.

New York, Nov. 20.—Increasing price irregularity and smaller dealings were the chief characteristics of the week in the stock market. Trading lost much of its recent vigor and the market showed a more professional interest began to lag.

As a group the metal shares were the underlying force, all prominent issues adding to previous advances on the continued rise in the price of the metal which showed a gain of a full cent in the pound. There was considerable profit taking, however, and that fact together with the publication of the terms of the disintegration of the Guggenheim Exploration company resulted in recessions of two to three points from the top.

War Shares Off. War shares of almost all descriptions were off, and, in some cases, inside liquidation with substantial loss, but some of the motor stocks particularly General Motors made new gains.

United States Steel rose and fell within a narrow radius, that stock being the especial objective with short interest. Conditions in the steel industry have lost none of their high promise. If anything, demand is on the increase and for many finished parts in excess of production.

London Sales. In its general effect the renewed strength of exchange on London which rose to its highest quotation since early in October was the most noteworthy development. London continued to offer our stocks and bonds but the volume of exchange on that center rose.

There was a better inquiry for high class railway shares and, also, for notes as well as the preferred stocks of the better known industrial companies. October reports of the leading railroads will soon be at hand and they are expected to show increases over the very excellent statements of the preceding month.

Garver Wants Records Kept of Court of Topeka Trials.

A plan to eliminate a great deal of the trouble caused by the court of Topeka's not being a court of record testimony, has been worked out by Robert Garver, assistant county attorney, and probably will be tried out soon.

Garver would in the future, at the end of every criminal preliminary in the district court, have the state's attorney dictate a short statement of charges and testimony to Will Anderson, stenographer in the county attorney's office, for the records of the county attorney's office.

All criminal cases following the preliminary when bound over to the district court are without record of testimony, the state's attorney depending entirely upon his memory for the evidence in the case. Owing to this the attorney is often faced with a big and powerful enough to stand successfully against any other navy in the world and "an army big enough to save the country from the horrors of defeat and humiliation, even should our navy be destroyed."

"Our little, poorly equipped army would not be able to offer resistance enough to make a ripple in the line of the enemy's advance," Mr. Maxim said. "Our army would make just about one good day's killing."

The chief lesson of the present war is that we should prepare against war. From every sense of obligation; from every sense of duty and religion, we should get ready—and lose no time about it."

San Francisco, Nov. 20.—A broad investigation of the federal immigration service on the Pacific coast has been made upon the authority of Secretary of Labor Wilson, according to a statement here today. Denmore is directing an inquiry into the charges that have been preferred against the immigration service in California.

The present investigation is said to have resulted directly from the exposure of the Mongolian Chinese smuggling conspiracy, after the arrest of George O. Fitzgibbon, to this port on the last voyage of the steamship Mongolia. It is alleged the intention was to smuggle the Chinese ashore. Secret service operatives of the United States government, it is said, are now on their way from San Francisco to this city under instructions to report to Denmore.

Win First Fight. "After having started a campaign of public education in the United States, showing that hay fever is due to the pollen of weeds and that hay fever, the most common form of allergy, in almost all cases to the two varieties of rag weed, the common rag weed (ambrosia artemisiifolia) found in the middle and northern states, and the giant rag weed (ambrosia trifida) found in the south, the American Hay Fever Prevention association has concentrated its first efforts in New Orleans with the first inning to its credit," the report reads.

"The public was first educated regarding the rag weeds, so that they could be easily recognized. Illustrations of the weeds were published in the bulletin of the state medical board of health and the public press, and the weeds, in full development, were exhibited in the show windows of the principal street.

"The city of New Orleans, through the commissioner of public health, placed at the disposal of the association twenty convicts, who cleared the streets and sidewalks of the outer sections of the city of the various weeds, in accordance with a map prepared by the topographical committee of the association, showing the areas infected with rag weed.

"The state board of health published the illustrations of the rag weeds and abstract of the development of the hay fever sufferers, and the city board of health assisted by enforcing the cutting of weeds on vacant lots. The commissioners of the various parks had the rag weeds destroyed in the public parks under the direction of the association."

Other Towns Can Profit. Dr. W. Scheppegrell, president of the American Hay Fever Prevention association states that what has been effected in New Orleans can be done in all other towns and efforts in this direction. It is started in the spring.

Hay fever is a distinctive preventable disease, and Dr. Scheppegrell believes that in a few years cases will become rare. The length of time will depend upon the degree to which loathsome weeds are infected with the fever producing weeds and the energy of the people in destroying them.

Sixteen States Co-operate. The prevention society has had enough offers of active co-operation from a large number of state boards of health, among which are Arkansas, Delaware, Florida, Idaho, Iowa, Kansas, Kentucky, Louisiana, Massachusetts, Michigan, Minnesota, New York, North Carolina, Virginia and West Virginia.

The United States board of agriculture is assisting, and Dr. Rupert Bell, surgeon general of the United States public health service, has given his aid to the association states as follows: "It appears that the most practical method of securing the co-operation of the states is without record of testimony, the state's attorney depending entirely upon his memory for the evidence in the case. Owing to this the attorney is often faced with a big and powerful enough to stand successfully against any other navy in the world and "an army big enough to save the country from the horrors of defeat and humiliation, even should our navy be destroyed."

"Our little, poorly equipped army would not be able to offer resistance enough to make a ripple in the line of the enemy's advance," Mr. Maxim said. "Our army would make just about one good day's killing."

FIGHT HAY FEVER

American Hay Fever Prevention Society Finds Remedy.

New Orleans Experiment Proves a Big Success, Report Says.

LOCAL SUFFERERS INTERESTED

Fight the Weed, Is Motto of Fighters in 16 States.

State Boards of Health Co-operate in Work of Eradication.

Hay fever victims in Topeka see a port in a storm. Recently such veterans as W. H. Wasson, city commissioner of finance, and Dr. L. M. Powell, of the American Hay Fever Prevention association, have been receiving the American Hay Fever Prevention association the story of the first successful fight against this sneezing malady.

The pamphlet which was prepared by Dr. W. Scheppegrell, A. M., president of the American Hay Fever Prevention association and Oto-Laryngologist, tells of the fight made in New Orleans, La.

"After having started a campaign of public education in the United States, showing that hay fever is due to the pollen of weeds and that hay fever, the most common form of allergy, in almost all cases to the two varieties of rag weed, the common rag weed (ambrosia artemisiifolia) found in the middle and northern states, and the giant rag weed (ambrosia trifida) found in the south, the American Hay Fever Prevention association has concentrated its first efforts in New Orleans with the first inning to its credit," the report reads.

"The public was first educated regarding the rag weeds, so that they could be easily recognized. BRITISH USE RUSSIAN

Carry Ammunition and Troops Under Red Cross Flags.

This Is Latest Charge Made by German Officers.

Berlin, Nov. 20.—That English transports are using Red Cross flags to get troops and ammunition to the Balkans is charged in wireless messages from German submarines operating in the vicinity of Saloniki.

Proof from sources near Gibraltar is also claimed that seventy English transports have passed the heavily laden and painted like hospital ships, on their way to Greek waters.

These statements were made today by an admiralty official in the closest touch with German submarine activities.

"One English transport was sunk off Saloniki," he said, "and since that time the English have been sending scores of hospital ships into the Aegean sea. Every one of those craft, ostensibly hospital ships, carried a heavy cargo for they were swimming deep."

"Every one of those craft, ostensibly hospital ships, carried a heavy cargo for they were swimming deep. The cargo was what the German navy has been dropping Red Cross flags over a space painted on the vessel's side."

Concerning the seventy vessels said to have passed Gibraltar on the voyage to Saloniki, the official said: "Every one of those craft, ostensibly hospital ships, carried a heavy cargo for they were swimming deep."
